EDUCATION

Seoul National University

Mar. 2022 – Feb. 2024

M.S. in Data Science, Graduate School of Data Science

Seoul, Korea

- **Thesis:** Towards a Complete Benchmark on Video Moment Localization
- **Advisor:** Prof. Joonseok Lee (Visual Information Processing Lab)

Seoul National University

Mar. 2016 – Feb. 2022

B.S. in Astronomy (Minor: Physics), College of Natural Sciences

Seoul, Korea

- **Thesis:** Black Hole Mass Estimation of H-Alpha Broad Emission Line
- **Advisor:** Prof. Jong-Hak Woo

PUBLICATIONS

Finding NeMo: Negative-mined Mosaic Augmentation for Referring Image Segmentation

Seongsu Ha*, Chaeyun Kim*, **Donghwa Kim***, Junho Lee, Sangho Lee

ECCV 2024

- Proposed a data augmentation method that builds challenging mosaic images using CLIP-selected hard negatives, improving referring image segmentation performance.
- [arXiv:2411.01494](#) [Project Page](#)

Towards a Complete Benchmark on Video Moment Localization

Jinyeong Chae*, **Donghwa Kim***, Kwanseok Kim, Doyeon Lee, Sangho Lee, Seongsu Ha,

AISTATS 2024

Jonghwan Mun, Wooyoung Kang, Byungseok Roh, Joonseok Lee

- Conducted an extensive benchmark study measuring performance of representative methods across 7 datasets for video moment localization.
- [PMLR](#)

* denotes equal contribution

EXPERIENCE

Samsung Electronics

Oct. 2024 – Present

Software Engineer

Seoul, Korea

Samsung Research → AX Team (Management Diagnosis Office)

DoXA — Document Extraction and Analysis (Internal Service, 2025.01–2025.12)

- Developed a document QA benchmark dataset targeting image-heavy document understanding, supporting evaluation of multimodal parsing capabilities
- Owned end-to-end production deployment of internal AI service, including K8S setup, PostgreSQL HA configuration, and BE/FE development

Ehcro — Multi-Agent Orchestration Engine (Internal Service, 2026.01–2026.05)

- Managed production deployment of LLM-based multi-agent service, establishing CI/CD pipelines and conducting cluster-level reliability testing

Rosetta — Internal Translation Agent Service (2026.06–Present)

- Building an agentic translation service for product manuals across Mobile eXperience and Digital Appliances business, handling both BE and FE development

SETsystem

AI Research Intern

Sep. 2021 – Dec. 2021

Seoul, Korea

- Surveyed SOTA models for object detection and semantic segmentation to detect ship & wave on radar maps
- Replaced Mask R-CNN with a simpler U-Net architecture, improving mIoU by over 1%

SKILLS

Languages : Python, C++, HTML/CSS, SQL

ML / DL : PyTorch, Scikit-learn, NumPy, Pandas

Infra / DevOps : Kubernetes (k8s), Docker, CI/CD
